Education & Certification

Colorado State University Global | B.S. in Cybersecurity — Graduated 2026

CompTIA Security+ CE — Aug 2026

Technical Skills

Security Monitoring & Assessment: Wazuh SIEM, Nessus scan configuration, Metasploit, Windows Event Log analysis

Digital Forensics: Wireshark, Volatility 3, FTK Imager, Paraben E3, JumpList Explorer, MFTECmd

Systems & Administration: Windows, Windows Server, Ubuntu Linux, Active Directory user/group administration, Local Group Policy, endpoint hardening

Scripting & Databases: PowerShell, SQL

Technical Projects

Lockdown DFIR Investigation Lab — GitHub Repository — Sep-Oct 2026

- Correlated packet capture and memory evidence to reconstruct a simulated IIS compromise involving SMB web-shell deployment and suspected reverse-shell activity.
- Used Volatility 3 to link malicious execution and Startup-folder persistence to IIS; assessed malware capabilities using VirusTotal.
- Authored an incident report with an attack timeline, MITRE ATT&CK mappings, and remediation recommendations using a self-developed IR SOP.

CorporateSecrets - Windows Forensics Lab — GitHub Repository — Oct 2026

- Examined Windows registry, browser, and application artifacts to investigate suspected data exfiltration in a forensic image.
- Correlated Jump List and MFT identifiers to locate a renamed document in the Recycle Bin, verifying its Word structure despite an .xml extension.
- Documented findings, evidence, and investigative limitations, distinguishing confirmed document activity from unverified exfiltration.

Wazuh SIEM Home Lab — GitHub Repository — Aug 2026

- Deployed Wazuh on Ubuntu to monitor two Windows endpoints and one macOS endpoint.
- Automated Windows hardening with PowerShell and LGPO; corrected nine audit-policy regressions and increased passing SCA checks from 122 to 142 per endpoint.
- Validated alerts for account creation, privileged group changes, failed logons, account lockout, and file modification/deletion.

Relevant IT Experience

IT Help Desk Assistant — Academic Practicum — Jan 2022 - May 2022

Pine Creek High School | Colorado Springs, CO

- Troubleshot Windows workstations, printers, peripherals, and classroom technology for faculty.
- Clarified technical issues, explained resolutions to nontechnical users, and escalated unresolved problems.

Customer Service & Field Experience

Property Maintenance Contractor — May 2024 – Present

Self-Employed | Colorado Springs, CO

- Independently manage client requests, estimates, scheduling, materials, troubleshooting, and repairs.

Bounce House Technician — Intermittent/On-Call — Aug 2023 - Present

Colorado Springs Bounce Houses | Colorado Springs, CO

- Configure, inspect, and troubleshoot equipment at customer locations while following safety procedures.
